

SB Specialty Metals is one of the largest distributors of tool steels in North America.

With over twenty million pounds of steel in inventory, we can service nearly any tooling needs.

Supporting our extensive stocking program is, a network of warehouses located in the major industrial areas of the U.S.

Our warehouse facilities contain a full complement of cutting and processing equipment to meet your size requirements.

This Quick Check Stock Guide is a brief overview of the grades currently being stocked, but it is by no means a complete list of the items that we can offer.

Our goal and commitment is to provide high quality specialty steels at competitive prices combined with timely and responsive service.

Locations

Chicago
4501 West Cortland St
Chicago, IL 60639
